Dungeon of the Algebra Dragons

A challenging and enjoyable way to develop algebra skills.

Overview:

You have been locked in the infamous DUNGEON OF THE ALGEBRA DRAGONS. To make your way to freedom, you must search through the Dungeon for the two Magic Keys...But beware of the Algebra Dragons. If they find you, you must use your Algebra skills to outwit them or your escape may be foiled.

You start your journey with 1000 gold pieces. When a Dragon finds you he will give you an Algebra Problem to solve. He will add to your gold reserves if you are correct, or take some of your gold if you are wrong. When your gold is gone, he will have you for supper. On your journey through the Dungeon, you will also be confronted by poisonous spiders, trap-doors and other surprises to make your escape more challenging. Will you escape from the Dungeon or become "Dragon's Delight"?

At A Glance:
